Menci · Huang Haorui(黄浩睿)

huanghaorui301@gmail.com

Education

Renmin University of China (Beijing), Computer Science (Turing Class)

2018 - 2022

Served as a teaching assistant in Advanced Programming and Summer Programming Practice course.

Projects

https://github.com/Moeditor/Moeditor

Markdown editor based on Electron and CodeMirror. With friendly GUI, real-time preview, synchronized scrolling, code highlighting (Highlight.js), math rendering (MathJax) and so on. Got 4000 stars on GitHub.

https://github.com/syzoj

Competitive programming online judge system based on Node.js. With friendly GUI, multiple problem types and real-time progress feedback. Supports distributed judgeing and ensure security with Linux cgroup. There're two versions (two independent projects):

SYZOJ 2

Simple web backend based on Express + EJS. Frontend with Semantic UI. With a community of secondary development, it's widely used in high schools' olympiad in informatics.

SYZOJ NG

Separated front and back ends. Backend with Nest.js and frontend with React. Highly modularized. Support cloud deployment. With much better extensibility, security and stability.

https://loj.ac

Public online judge website with the SYZOJ system above. System maintained by myself and contents maintained by the community. Mainly for NOI and ICPC players. Have 20,000 users and 1,000,000 submissions! Currently the website is deployed on Azure cloud computing services and Wasabi cloud storage. Using our own hardware for code running.

Awards

1st Prize in National Olympiad in Informatics in Provinces (NOIP) Silver Medal in National Olympiad in Informatics (NOI) Silver Medal in 43rd ACM-ICPC Nanjing Regional Bronze Medal in 43rd ACM-ICPC EC-Final

2015, 2016, 2017

2017

2018

2018

Skills

- Algorithms: Participated in algorithm competitions several times and won the awards above.
- Linux: Use GNU/Linux as desktop and server OS proficiently. Familiar with command-line.
- Web: Familiar with |S and TS. Able to do simple web development & deployment and UI design independently. Backend: Proficient with Node.js. Able to develop small web backend with PHP and Python. Frontend: Skillfully use jQuery and React. Familiar with Chrome DevTools' regular use.
- C/C++: Familiar with modern C/C++'s regular use. Skillfully using gdb. Able to develop small C/C++ projects. Such as my coursework: Transaction Tester, Web Crawler, HTML Parser, Simple Search Engine and so on.
- Skillfully search Google and read docs like man-pages, cppreference and MSDN to solve problems.

● 教育

中国人民大学(北京),计算机科学与技术(图灵实验班)

2018 - 2022

在校期间担任过高级程序设计和暑期编程综合实践的助教。

🧖 项目

Moeditor

https://github.com/Moeditor/Moeditor

基于 Electron 和 CodeMirror 的 Markdown 编辑器,具有友好的用户界面,支持实时预览、同步滚动、代码高亮 (Highlight.js) 、数学公式渲染(MathJax)等功能。已在 GitHub 上获得 4000 Star。

SYZOJ

https://github.com/syzoj

基于 Node.js 的用于程序设计竞赛的代码在线评测系统,提供友好的用户界面,支持多种题目类型,实时反馈评测进 度。评测采用分布式架构,使用 cgroup 沙盒保证安全性。前后开发了两个版本,分为两个独立的项目:

SYZOJ 2

后端为基于 Express + EJS 的简易 Web 服务器,前端采用 Semantic UI,有一定的二次开发社区规模,被广泛应用 于中学信息学竞赛的校内评测系统。

SYZOJ NG

采用前后端分离架构,后端基于 Nest.js,前端基于 React,模块化程度高,可部署在云计算平台上,**可扩展性更强,** 安全性与稳定性更好。

LibreOJ https://loj.ac

使用上述 SYZOI 系统搭建的公共在线代码评测网站,系统由本人维护,内容由社区维护,主要面向青少年信息学竞 赛(NOI)选手与大学生程序设计竞赛(ICPC)选手,**拥有两万用户和 100 万评测量。** 目前部署于 Azure 云计算服务与 Wasabi 云存储上,评测机使用自有硬件。

奖项

全国青少年信息学奥林匹克联赛(NOIP) 一等奖 全国青少年信息学奥林匹克竞赛(NOI)银奖 第43届ACM-ICPC区域赛南京站银奖 第43届ACM-ICPC东亚地区总决赛(EC-Final)铜奖

2015, 2016, 2017

2017

2018

2018

技能

- 算法: 多次参加 NOI、ICPC 系列比赛,获得了上述奖项。
- Linux:熟练使用 GNU/Linux 作为桌面与服务器系统,熟练使用命令行操作。
- Web: 熟练编写 IS 和 TS,能够独立完成简易 Web 应用前后端的开发与部署,以及简单的 UI 设计。

后端:能够使用 PHP、Python 开发小型后端应用,熟练使用 Node.is 进行后端开发。

前端: 熟练使用 jQuery、React 进行前端开发。熟悉 Chrome DevTools 的常规使用。

- **C/C++**:熟悉现代 C/C++ 的常规使用,熟练使用 qdb 进行调试,能够使用 C/C++ 开发小型项目。 如作为课程作业完成的<u>事务测试器</u>、<u>爬虫</u>、<u>HTML 解析器</u>、<u>简易搜索引擎</u>等。
- 熟练使用 Google 搜索并解决问题,熟练查阅 Man-pages、cppreference、MSDN 等文档。
